ATC Associates Inc. Teams with Habitat For Humanity Central AZ to Construct First Net Zero Energy LEED Platinum Certified Concrete Home

It was announced on August 21, 2009 that [ATC](#) will expand its participation with Habitat for Humanity Central AZ by donating services and labor to the construction of their first Net Zero Energy LEED Certified concrete home. Joe Holmes, ATC's West Region Manager, Business Development commented, "This is the first Net Zero Energy LEED Platinum Certified concrete home constructed by Habitat for Humanity Central AZ, and we're proud to

be a part of this effort, in conjunction with Salt River Materials Group. For us, it is a perfect way to give back to the community, help the environment and further entrench [ATC](#) in the sustainability marketplace." The initial geotechnical evaluation, soils report and recommendations, and compaction testing were provided by ATC pro bono, and a team of volunteers comprised of ATC employees will help with construction.

The Habitat LEED Certified home will be a featured tour stop during Greenbuild '09 held in Phoenix in November. Construction is underway and staff members from [ATC's Tempe](#) office plan to participate with their team of volunteers on September 19th. ATC will be recognized along with the other sponsor names and logos on a large sign at the site and the company representatives will be available during Greenbuild '09 at the Habitat for Humanity and Salt River Materials Group booth areas.

[ATC Associates Inc. \(ATC\)](#) is a multi-disciplinary, science and engineering firm committed to helping clients accelerate sustainable business strategies by offering expertise in these areas: [Environmental Management](#), [Geotechnical Engineering](#), [Construction Materials Testing & Special Inspection](#), [Roofing & Water Proofing Consulting](#), [Industrial Hygiene & Occupational Health](#) and [Environmental Health & Safety Training](#).
